

## Build a Web Presence for your Research with CreateFSU

[CreateFSU](#) is a web hosting service designed to give FSU researchers, learners, and instructors a digital space to showcase their work. CreateFSU provides easy-to-use content management systems like WordPress and MediaWiki. These applications give you simple authoring, editing, and publishing options, while still providing flexibility in style, format, and presentation.

What types of things can I build with CreateFSU?

- A site with interactive data visualizations
- A book, thesis, or dissertation supplement
- An online exhibit
- A collaborative research blog
- Open Educational Resources
- A public website for your grant project to post goals, outcomes, and updates
- A collaborative blog for a course you teach

CreateFSU provides users with a custom subdomain of create.fsu.edu and 1GB of space to start. It's the perfect venue for publishing grant outcomes, collaborating with peers, and doing public scholarship. You can see examples of existing projects at our [Projects Exhibit](#).

If you are interested in applying for an account, follow the instructions on our [Getting Started](#) page. You can find the answers to many common questions about this service at our [FAQ page](#), but we're always happy to answer further questions at [lib-create@fsu.edu](mailto:lib-create@fsu.edu).
